The following tags can be used to display the posts on the home page:

#top-left (2 posts)
#top-center + featured (1 post)
#top-right (4 posts)
#top-middle (4 posts)
#top-bottom-left (2 posts)
#top-bottom-right (1 post) (there must be at least one post in top-bottom-left section)
#more (5 posts)

#home-newsletter makes display a newsletter form widget in the home view
#home-widget makes page display in home optional widget area

styles tags for #home-widgets

#no-title removes widget title
#image-center center and limit size of widget

Posts

You can use custom styles for images alignment with the following html code:

Left Aligned

```
<div class="left-aligned">
  
</div>
```

Right Aligned

```
<div class="right-aligned">
  
</div>
```

and custom styles for quotes alignment with the following html code:

Left Aligned

```
<blockquote class="left-aligned">
  “The first step toward success is taken when you refuse to be a captive of the environment in which you first find yourself.”
  <cite>– Mark Caine</cite>
</blockquote>
```

Right Aligned

```
<blockquote class="right-aligned">
  “It is our choices, that show what we truly are, far more than our abilities.”
  <cite>– J. K Rowling</cite>
</blockquote>
```

Sidebar

Sidebar contains the main menu along some optional widgets.

`#sidebar-newsletter` activate newsletter form on the sidebar

`#sidebar-channel` makes channel display as an item on the sidebar menu for channels `#sidebar-widget` makes page display as a widget on the sidebar

Header

You can add any page to the header main menu with the following tag:

`#main-menu` displays any page as a menu item in the header menu

Footer

There is a social menu that can be set up from the secondary menu of Ghost and a section for any other page and his own tags. You can use this section to display your channels and their tags.

Social menu

From within your Ghost admin panel under Settings » Design set up your social menu with the following names.

- facebook
- twitter
- instagram
- mastodon
- linkedin
- youtube
- pinterest
- github
- reddit
- skype
- telegram

Footer sections

`#display-footer` add this tag to one page to show the footer sections, the last section of the footer will use the title and content of this page. `#footer-channel` any page with this tag will be shown in the footer along with the tags attached to that page.

Tags Page

Displays tags assigned to that page as featured tags.

Name: page title

Content: page description

Authors Page

Displays authors assigned to that page as featured authors.

Name: page title

Content: page description

Channels Page

Displays a list of featured channels.

Name: page name and sidebar widget name

Content: page description

Optional tags:

`#display-sidebar-channels` activate sidebar widget for channels

Channel

Channels can group multiple tags for a better organization.

`#featured-channel` display channel on channels page `#footer-channel` displays channel page along with tags of that page as menu items `#sidebar-channel` displays channel as a menu item on sidebar channel menu

Set up a new channel

Create a channel to unify a group of tags.

1. Set up your channel in the routes.yaml file, download this file from within your Ghost admin panel under Settings » Labs

```
routes:
  /travel/:
    data: page.travel
    controller: channel
    template: channel
    filter: tag:[cities,food,places,gear]
```

2. You must define the tags related to your new channel in the filter section of your new channel definition.
3. Upload the routes.yaml file from within your Ghost admin panel under **Settings » Labs**
4. Create a page with the same page url of your channel, in this example "travel"

You can find some examples of channels in the routes.example.yaml file inside the theme folder.

Membership

Setup your membership page content from this pages: * Membership Free Page: content free * Membership Monthly Page: content monthly * Membership Yearly Page: content yearly

Use the following html code to set up your membership tables custom content:

```
<li class="membership-plan-feature">Full access to all private posts</li>
<li class="membership-plan-feature">Weekly email newsletter</li>
<li class="membership-plan-feature">Support independent publishing</li>
<li class="membership-plan-feature">Simple, secure card payment</li>
<li class="membership-plan-feature">One easy payment instead of 12!</li>
```

Setup bottom mail contact in **Meta data -> Meta description**

Newsletter

Name: page title
Content: page content
